

Kian Foshee

Software Engineer | Founder | Research Contributor

Los Angeles, CA | kianfoshee@gmail.com | 469-493-8999 | [LinkedIn](#) | kianfoshee.com

PROFILE

Software engineer, founder, and research contributor focused on building technical products and analytical systems from first principles. Currently building Meridian, grid infrastructure software for large flexible electricity loads. Previously built a consumer company to \$50K+ in revenue and contributed data pipelines and analysis to economic-mobility research at Opportunity Insights.

EDUCATION

University of Southern California <i>Freshman</i>	Los Angeles, CA
St. Mark's School of Texas <i>Class of 2026 4.3/4.0 GPA</i>	Dallas, TX

TECHNICAL SKILLS

Engineering	JavaScript, TypeScript, React, Next.js, Node.js, PostgreSQL, full-stack development
Data	R, Python, SQL, data pipelines, statistical analysis, data cleaning, validation, visualization
Research	Reproducible workflows, exploratory analysis, literature review, research writing, stakeholder interviews, qualitative synthesis

EXPERIENCE

Meridian Founder <i>Grid infrastructure software for large flexible electricity loads</i>	2026-Present
- Building software that helps data centers and other flexible loads connect to the electric grid faster by reducing demand during the small number of hours when local grid capacity is constrained. - Developing the software and operating layer that converts time-varying grid headroom into dispatchable load flexibility, unlocking capacity that would otherwise remain unavailable for new connections.	
Opportunity Insights Harvard University <i>Economic mobility research with Matt Staiger and Jamie Fogel SSRN profile</i>	Research Contributor
- Contributed analysis supporting two research papers on entrepreneurial exposure and intergenerational mobility. - Built reproducible R pipelines to clean, join, validate, and analyze large unstructured datasets. - Produced 50+ research artifacts including graphs, tables, validation outputs, and documented analysis files used to inspect results and communicate findings.	
Supreme Pickle Founder <i>Direct-to-consumer sporting-goods company</i>	Started at age 14
- Founded and independently grew the company to \$50K+ in revenue, 40K+ followers, and 100M+ views, reaching Amazon #1 Best Seller status and USAPA approval. - Used customer feedback, performance data, and rapid product iteration to refine the product, marketing, and operations.	

HONORS

- World Economics Cup:** Individual Top 10 and Team 4th at the World Finals (47 countries and 2,500+ competitors).
- Harvard Pre-Collegiate Economics Challenge:** 3rd Place Team and Individual High Distinction.
- Northwestern Economics Tournament:** 2nd Place (52 teams).
